### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

With respect to claims 1-50, 53 and 56-66, the prior art references of record fail to teach or fairly suggest the combination of elements recited in claim 1 or 64 and/or the use of a device including the combination of elements recited in claim 1 or 64 wherein the transporter is configured to perfuse an organ or a tissue and/or the portable housing includes openings allowing tubing to connect with an organ or tissue wherein the tubing can pass through the openings when the housing is mated with the transporter compartment. While the references of Peterson (US 3810367) and Thomson (US 1,369,367) include a transporter and portable housing with heat transfer surfaces that contact with one another, the transporters are not configured for organ or tissue perfusion and/or to include tube openings. While the prior art of Clark et al.(US 3,995,444) and McKelvey et al.(EP 0 376 763) disclose transporter devices configured to perfuse an organ while contained within a portable housing, one of ordinary skill in the art would not be motivated to modify the systems of either Peterson or Thomson to include perfusion structures and/or tube openings since the heat exchange of the perfusion fluid in the references of Clark et al. and McKelvey et al. occurs with respect to the fluid flow circuit rather than the portable housing external surface as is required of the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM H. BEISNER whose telephone number is (571)272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.
